Freedom of Access

That's a term used a lot these days when people talk about the Internet and it means very different things to different people. We believe that Freedom of Access is at the center of progressive Internet agenda. Like everything else about the Internet, this is developing every day in discussions all over the Internet. Below are some ideas about how to frame those discussions.

Programs

Complete access to use, move, change, manipulate and share all programs on the Internet and get assistance in doing any of those things. Would you be able to take your database or web mail program or web site program with you to another provider if you wanted to?

Democracy

Complete transparency in and available explanations of all processes that dictate and enable our work on the Internet and the right to participate in decisions about those processes. Do you know how any why decisions are made regarding the programs and services you use online?
